1. AO = Administrative Order closed after compliance with the requirements of the order; APO = Administrative Penalty Order requiring compliance with environmental regulations and assessing a penalty; CACO = Consent Agreement and Order requiring compliance with environmental regulations and/or assessing a penalty; CJ = Civil Judicial Case with the Department of Justice

2. All penalties are Final

3. SEP = Supplemental Environmental Project

Narrative Summary:

THE CONSUMER CONFIDENCE REPORT (CCR) RULE: This rule is an important part of the 1996 Amendments to the Safe Drinking Water Act (SDWA). The CCR final Rule, which became effective September 18, 1998, provides a framework that water suppliers will use to give consumers information on their drinking water. Under 40 CFR Part 141 Subpart O, all community water systems (CWSs) were required to provide their customers with an annual quality report or CCR by October 19, 1999. Some CWSs have delivered the first round CCR reports to their customers but some did not comply with this rule. The majority of the enforcement actions listed as SDWA violations are the water systems that did not comply with the first round CCR rule and were targeted for the administrative orders by EPA Region 6.

BAY OFFSHORE LTD (Seawolf Group), NEW IBERIA, LA: On September 22, 1999, a Complaint was filed, settling an administrative case against Bay Offshore Ltd (Seawolf Group), (Respondent). The Complaint alleged RCRA violations stemming from Respondent's failure to meet permit exemptions in the areas of Paint Building, Metal Cage and Drum Storage Area, label used oil containers, and modify generator status. A total penalty of \$46,620 was agreed upon by the Respondent. The violations were observed during the review of a Compliance Evaluation Inspection and 3007 Request for Information.

CARBOLINE COMPANY, LA: A Complaint and CACO were filed against Carboline Company. The Complaint alleged RCRA violations stemming from facility's failure to meet "storage permit" exemptions (i.e. no hazardous waste labels, missing inspection reports) and failure to ensure that the drum in the satellite accumulation area was closed. A \$10,670 penalty was outlined in the Complaint. The violations were observed during a Compliance Evaluation Inspection.

TEXAS GAS TRANSMISSION CORPORATION, LA: A Complaint and CACO were filed against Texas Gas Transmission Corporation. The Complaint alleged RCRA violations stemming from facility's failure to meet "storage permit" exemptions (i.e. storage for greater than 90 days) and failure to make hazardous waste determination. A \$56,801 penalty was outlined in the Complaint. The violations were observed during a Compliance Evaluation Inspection and review of a 3007 Request for Information letter.

T. T. COATINGS INC., WESTWEGO, LA: The Region filed a Complaint on T. T. Coatings for violations of the Resource Conservation & Recovery Act. The facility stored hazardous waste for over ninety-days without a hazardous waste storage permit. The facility was also storing used oil in tanks that were not labeled “used oil”. The Complaint alleges that the facility was operating without a permit and assesses a civil penalty of \$ 26,054. The facility will do a Supplemental Environmental Project as part of their settlement.

WESTLAKE PETROCHEMICALS CORP., SULPHUR, LA: The U.S. Environmental Protection Agency Region 6 (EPA), in consultation with the Louisiana Department of Environmental Quality (LDEQ), issued a Consent Agreement and Final Order to Westlake Petrochemicals Corp. of Sulphur, La., for violations of federal and state regulations governing air emissions, the storage and handling of hazardous materials, and the use of toxic substances. Federal penalties total \$76,458. Westlake Petrochemical has agreed to install and operate air monitoring equipment at its fence-line to measure various hazardous constituents for 3 years. The facility will also maintain a web site, as a mechanism to provide data from its air monitoring equipment. In addition, Westlake Petrochemical has agreed to respond to local resident concerns regarding data from the air monitoring equipment within 24 hours of their request. The estimated cost for implementation of the air monitoring project is \$568,000. Westlake Petrochemical has also agreed to perform a third party compliance audit of its Sulphur facility. This audit will include all applicable State and Federal programs for its facility.
